

PRODUCT INFORMATION

PRODUCT: TRANSFUSION

PART NO.: M1432C

FUNCTION AND APPLICATION: To stop and prevent leaks in automatic transmissions by controlled softening of seals. Mixes with ATF and will not injure any parts. Helps reduce or eliminate noise, grinding, and slippage. Helps to “revive” sluggish transmissions. Ideal for use during fluid/filter changes.

OUTSTANDING PROPERTIES: One use product will stop simple automatic transmission leaks.

USE DIRECTIONS: Check transmission fluid level as indicated in owner’s manual. If the addition of TRANSFUSION would result in over-fill, drain out sufficient fluid to permit introduction of product. Add only one bottle to a transmission.

PRODUCT LIMITATIONS: If leak, noises or slippage persists, the need for mechanical attention is indicated.

PRECAUTIONS: View MSDS at www.gunk.ca.

STORAGE AND HANDLING: Store in a cool place, below 50°C away from oxidizing agents and ignition sources. Keep away from children and animals.

DISPOSAL: Safeguard our environment. Dispose of container, residue and excess product in accordance with all federal, provincial and local laws and regulations.

PACKAGING: 946ml bottle with c/r cap, packed 6 per case.

U.P.C. CODE: 0-60959-13142-2

WEIGHT PER CASE: 14 lbs. 6.36 kg

CASE SIZE: 12 x 7 x 9
